What Is FleetManager

Unique web-based software that is designed and developed to improve fleet productivity. Use this to monitor your fleet's real-time locations, play back up to 18 months of trip history, customisable business rules and generate professional fleet reports tailored to your needs.

Packed with more than 70 powerful features and 30 different reporting templates, it is suitable for diverse companies in logistics, construction, transportation, F&B, distribution, waste industries and more.

Fleets are every organization's major assets and yet poor management leads to major under utilization of assets and man power cost. Start using FleetManager now and we show you how to reduce fleet cost.

How It Works

How It Will Benefit You

- Protect your fleet with 24/7 “live” monitoring
- Automate vehicle maintenance and extend lifespan
- Improve customer service with accurate arrival time
- Monitor driver's driving habit to prevent accidents
- Reduce reporting work with automatic fleet reports
- Improve fleet accountability with management reports
- Enhance driver's punctuality with alert system
- Optional monitoring of fuel consumption, live cameras, security i-button and temperature control for cold trucks are easily configured to serves your need.

FleetManager

FleetManager Mobile is currently the number 1 mobile app for Fleet Manager in both Google Play and iTunes stores in Singapore. Unlike a mobile browser, this app promises fast loading time, speed and high performance necessary for monitoring a big fleet of vehicles.

Together with FleetManager Web, it creates a complete system for every organization interested in improving fleet productivity. More than 1000 satisfied users and a 4.5 star rating can't be wrong.

Key Features

“Live” Vehicle Monitoring and Alerts

Receive instant updates 24/7 of your vehicle's location, speed, engine status and more without manual refresh. Search or sort vehicles by date, vehicle number plate, distance and engine status. Receive alerts from this app when your driver violates business or traffic rules.

Intelligent Map Overview

View your entire fleets on your smartphone or tablet without compromising on viewing quality. FleetManager intelligently detects and displays where about your fleet of vehicles with a live icon that indicates the number of vehicles. To zoom in and out, simply use your two fingers to squeeze or un-squeeze the map screen. Knowing this is not possible on a mobile browser, that is why we build this app for you.

3D Vehicle History Playback

Download up to 18 months of fleet history on your FleetManager Mobile and view vehicles' trip-by-trip that include start and end address, time stamps and duration. The best part is you can play back vehicle routes on Google 3D map. Possibly the one impressive feature no other app has.

Smart Walkie Talkie

Everyone knows what is a walkie-talkie. By combining a walkie-talkie feature into our FleetManager Mobile, our client saves money by removing walkie-talkie handset subscription. Drivers are happy too as they only need to carry one device around (i.e. Their smartphone) and enjoy both phone and walkie-talkie calling.

Google StreetView or Live Video Streams

FleetManager Mobile improves user experience by offering a dual screen interface as standard feature, that can view vehicle's current locations on map side-by-side with StreetView images. FleetManager Mobile is able to support real-time video streaming via 3G/4G network that is offered as an optional feature.

Fleet Analytics

Fleet analytics feature enable user to have a bird's eye view of its fleet activities using 3 donut charts that shows your fleets' current engine status, online status and their movement. Tap any of the donut charts to reveal list of vehicles belong to the respective donut sections. Especially useful on a big fleet, FleetManager Mobile offers a large overview of your entire fleet no matter small is your screen size.

Live Traffic and ERP Feeds

FleetManager Mobile pushes big data to your hands. Receives real-time traffic incidents and photos of AYE, CTE, PIE and other major expressways of Singapore. Get updated with current ERP rates on all major roads and make good decision for your fleet operations.

FleetManager Web

FleetManager Web is designed and developed on Microsoft platform. It provides users with the highest level of stability and cloud-based reliability with 99% guaranteed uptime.

The software offers a number of features stored under a single system that can be adapted to even most advanced business requirements. Together with FleetManager Mobile, it creates a complete system for any organization interested in improving its fleet's productivity.

Key Features

Fleet info at your fingertip

Whether your vehicles are moving, speeding, dangerous cornering, stationary, parking with engine on, our software delivers real-time information of your fleets to your PC. Too busy to check? You can play back up to 18 months of your vehicle's location history detailing point by point locations. Set up daily fleet reports directly to your email inbox in either HTML, CSV or PDF formats in just 2 simple steps.

Telegram Messenger

We are the first and only Fleet Management provider in Singapore to integrate the popular Telegram messaging feature into FleetManager software. With this unique feature, you can send text messages, photos and voice messages via mobile phone. Save hundreds of dollars of operations costs.

Fuel Monitoring

FleetManager software provides a simple-to-use interface to record fuel expense receipts for each vehicle with their real-time mileage. Our system offers both detailed and summary reports (with charts) which highlights fuel consumption for each vehicle or the entire fleet. Our clients use this to spot fuel theft, driver's driving habit and even detects engine fault.

Vehicle Maintenance

Fleet Management of today goes beyond just vehicles, locations and status. Our clients improve productivity by automating vehicle maintenance tasks such as regular servicing, tyre check, LTA inspection, renewal of road tax, insurance etc. Simply input each vehicle's maintenance tasks, dates, frequency, who-to-alert and let FleetManager take over the chores for you.

Route Optimization

Save time and fuel with smarter route planning by FleetManager software. This feature is built for faster and better delivery experience. Simply input your delivery addresses, press "Optimize" button on your PC and witness up to 30% shorter delivery time and travelled distance. Once planning is done, simply Press "Dispatch" button and all routes planning and schedule will be sent across to the respective drivers instantly with instruction.
